Ph No: +1-3015245137

LinkedIn: <https://www.linkedin.com/in/rohitverma0234/>

Github: <https://github.com/rohitverma0234>

SUMMARY:

- Passionate and seasoned professional developer with 2 years of experience in WordPress development, and experience of building Web applications with JavaScript / Reactjs / Nodejs and some other cool libraries and frameworks.
- Proven ability of transforming a completely manual process of build and deployment into a fully automated one.
- Expertise in quality development practices and in pursuing innovative ways to build and deploy software.
- Expert in fixing issues. An enthusiast of upcoming new technologies.

TECHNICAL SKILLS:

Languages: React JS, Redux, JavaScript, WordPress, Basic Node JS

Web Technology: HTML5, CSS3

Version Control: Git

FRONT END | FULL STACK WEB DEVELOPMENT EXCELLENCE CERTIFICATE:

I am proud to hold a certification in Frontend Development, demonstrating my proficiency in creating visually appealing and user-friendly web interfaces. Throughout this certification program, I have acquired a comprehensive skill set in HTML, CSS, JavaScript, ReactJS, Redux and Git the fundamental building blocks of web development.

Credentials:- certificate.codingninjas.com/verify/56cfe9439e5b8b0a

EMPLOYMENT HISTORY:

Walmart:

(September 2023 - Current)

Network Kings:

July 2021 - March 2023

PROJECT SUMMARY:

Domain: IT Services	Duration (2 years)
<p>Tools & Technologies: Visual Studio Code & React JS, WebPack Project Description:</p> <p>1. LinkedIn Clone (React JS, Redux, Firebase & Styled-Components)</p> <p>Features and Fuctionality: -</p> <ul style="list-style-type: none">• Login using Google (Firebase Authentication)• Create a new post• Share photos and videos (React player for videos)• Like posts• Realtime update likes and posts• Auto authenticate user on refresh• Sign Out <p>Tools & Technologies: Visual Studio Code, ReactJS, Redux, Firebase, JavaScript, HTML, CSS, Git</p> <p>Project Link: https://github.com/rohitverma0234/linkedin-app</p> <p>2. Personal Portfolio (React JS, Firebase & Styled-Components)</p> <p>This project aims to showcase my skills, projects, and achievements in an interactive and engaging manner. The portfolio will serve as a central hub for potential employers, clients, or collaborators to learn more about me and my work.</p> <p>Development Stack: -</p> <ul style="list-style-type: none">• Frontend: ReactJS, JSX, CSS3, React Router for navigation• State Management: React Context API• Animations: CSS animations• Responsive Design: Media queries and flexbox/grid for layout• Hosting: Firebase	

Tools & Technologies: Visual Studio Code, ReactJS, Firebase, JavaScript, HTML, CSS

3 . HULU Clone(ReactJS, REST API)

This project aims to replicate the core functionalities of Hulu, providing users with a visually appealing and responsive interface for streaming TV shows and movies.

Responsibilities: -

- Understanding the project requirement & design, feasibility study and preparing rough project development walk through
- Created POC & evaluated various tools & technologies to create a more scalable & reliable system.
- Analyzing and developing the requirements.
- Unit test of project before committing.
- Help maintain code quality
- Ensure the performance, quality and responsiveness of applications and web services
- Fixed bug

Tools & Technologies: Visual Studio Code, ReactJS, JavaScript, HTML, CSS, Git

Project Link: <https://github.com/rohitverma0234/Hulu-Clone>

4 . Amazon Clone(ReactJS, Context API)

This project will consist of a frontend developed using React, with the possibility of integrating a backend for features like user authentication, product storage, and order processing.

Responsibilities: -

- Understanding the project requirement & design, feasibility study and preparing rough project development walk through
- Created POC & evaluated various tools & technologies to create a more scalable & reliable system.
- Analyzing and developing the requirements.
- Unit test of project before committing.
- Help maintain code quality
- Ensure the performance, quality and responsiveness of applications and web services
- Fixed bug

Features and Fuctionality: -

- Functionalities Using- Login, Logout, Add To Cart, Delete To Cart, Authentication, JWT.
- Using Axios (Fetching data from backend)
- JWT (Creating token)

Tools & Technologies: Visual Studio Code, ReactJS, API, React Router, JavaScript, HTML, CSS, Git

Project Link: <https://github.com/rohitverma0234/Amazon-Clone>
